Why **Sahara Logistics** chose **Energy\$mart** to reduce their energy bills

With lighting contributing to over 75% of Sahara's total expenditure on energy, the logistics giants were extremely well placed to to save by upgrading to LEDs.

Over 480 LED lights were installed; a combination of Cherry LED T8 Tubes and Cherry LED Corn Lights. These products reduced Sahara's lighting energy usage by 70% and, with their lifespan of over 50,000hrs, reduce maintenance costs by over \$5,000 per annum.

## Why energy efficiency?

SOLAR ENERGY	LED LIGHTING
Dramatically reduced energy costs	Reduce maintenance costs with a lifetime of more than 50,000 hours
Rapid and generous return on your investment	Use up to 84% less electricity and lower your energy consumption
Access to free, clean energy from the sun	Dramatically improved working conditions
Battery ready status	Run on temperatures lower than 80°C reducing fire risks and cooling costs
